

Do You Have a Digital Transformation Strategy For Your Documents?

The ongoing shift from paper to digital documents and the growing need for automation across the enterprise is bringing about a new era of smart multifunction printers (MFPs) enhanced by software solutions as important as the hardware itself. A recent IDC report explains the need for a holistic strategy for digital transformation.¹

By 2020, over 50% of acquisition contracts for office-targeted smart MFPs will prioritize software and service offerings first.²

What is Content-Aware Print and Capture?

Digital transformation starts with documents. Content-aware print and capture software can protect the data in those documents from inadvertent and deliberate exposure.

Why is integrated MFP software so important?

Integrating content-aware print, capture and workflow technologies helps businesses transform the flow and understanding of captured information and documents throughout global workforces.

According to IDC, adding software as part of a holistic approach extends the functionality of the smart MFP to **address strategic business goals including:**³

Improve Data Visibility & Security

Leverage print and capture management to significantly reduce the risk of information loss and security breaches.

Ensure Compliance & Data Governance

Simplify audits with automated reports and support chain of custody initiatives through the capture and print workflow.

Reduce Costs & Optimize Workflows

Consolidate technology and automate business processes to increase efficiency and add value to existing infrastructure.

Drive End-to-End Process Orchestration

Integrate business process management (BPM) to transform process automation across enterprise document management workflows.

Kofax ControlSuite helps you meet these goals with:

Content-Aware Print, Capture & Output Management

Document & Information Security

Advanced Mobile Print & Capture Capabilities

Seamless Integrations

Wide Vertical Reach with Robust Feature Set

In the future of work, print and capture solutions must extend beyond basic printing, copying and scanning. Learn more in the full IDC study, "Today's Market Need for a Holistic Software Approach for Smart MFPs":
